

Palatine Place Apartments

Palatine, Illinois

PROJECT DESCRIPTION

This new ground up 5-story precast concrete and masonry apartment building with a 2-story underground parking garage is currently in the design phase. The project will include an elevated public green roof, a fitness center and a media room for use by the building occupants. This project will utilize Autodesk Revit, a BIM application. Located downtown Palatine the building will respond contextually to existing buildings through proper scale and façade treatment.
